### (54) **Securing of building elements without using mortar or glue**

(57) The invention relates to a building method. A building is erected by stacking building blocks. The building blocks are connected by means of pins engaging in holes in opposing sides of adjoining blocks. In cross-

section the holes are preferably round. At each connecting side there are preferably four holes. After erecting of the building, the formed wall constructions are stabilized by plastering the wall with stucco, reinforced with glass fibre.

**ANNEX TO THE EUROPEAN SEARCH REPORT  
ON EUROPEAN PATENT APPLICATION NO.**

EP 93 20 1821

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
