(54) **Eave ventilation device**

(57) The invention relates to an eave, particularly to an eave ventilation device (1) for attachment to the upper side of a fascia (2). Such an eave ventilation device (1) comprises a water discharging strip (3) to be put on the roof boarding and on the upper side of the fascia, attachment means (16) for attaching the device to the

fascia (2), and ventilating duct forming means (5) integrally formed with the strip which means are entirely situated at the upper side of the water discharging strip facing away from the roof boarding, which means also form supporting means for the roof tiles at the level of the fascia.
