(54) **A method for providing a projection covered by grass, having a shape in form of a piece of furniture, such as an arm-chair, bench or the like and a device for carrying out this method**

(57) A projection covered by grass is made by arranging a supporting skeleton (1) made of relatively stiff, biodegradable material, forming a plurality of containing cavities (2) whose tops are open. These cavities are filled with earth to obtain a continuous external covering

surface (3). The skeleton is shaped so that said continuous external covering surface (3) creates a shape in the form of a piece of furniture, for example, in the form of an armchair, bench or the like. This surface is sown and cultivated to obtain grass (4) covering said shape in the form of a piece of furniture.

**ANNEX TO THE EUROPEAN SEARCH REPORT  
ON EUROPEAN PATENT APPLICATION NO.**

EP 01 12 7090

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.  
The members are as contained in the European Patent Office EDP file on  
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
