(54) An oscillating container-diffuser for a volatile corrosion inhibitor

(57) An oscillating container-diffuser for a volatile corrosion inhibitor includes an outer body (4) and an inner body (6) containing a volatile corrosion inhibitor in granules or powder (G). A spring element (12) causes the granules or powder to be mixed during transport of

the object with which the oscillating container-diffuser of volatile corrosion inhibitor is associated. Sublimation of the granules or powder (G) is increased thanks to the forced passage of air, produced by the oscillating movement caused by the spring element (12).

ANNEX TO THE EUROPEAN SEARCH REPORT ON EUROPEAN PATENT APPLICATION NO.

EP 01 12 3024

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
