CORRECTED EUROPEAN PATENT APPLICATION

Note: Bibliography reflects the latest situation

(15) Corrected version no. 1 (V

Corrected version no 1 (W1 A1) INID code(s) 30

(51) Int CI.⁷: **A61B 5/087**, A61M 16/00, A61B 5/085

(48) Corrigendum issued on:

25.06.2003 Bulletin 2003/26

(43) Date of publication:

22.01.2003 Bulletin 2003/04

(21) Application number: 02102493.0

(22) Date of filing: 23.09.1997

(84) Designated Contracting States:

AT BE CH DE DK ES FI FR GB GR IE IT LI LU MC

Designated Extension States:

AL LT LV RO SI

(30) Priority: 23.09.1996 AU PO247496 14.08.1997 WOPCT/AU97/00517

(62) Document number(s) of the earlier application(s) in accordance with Art. 76 EPC:

00104511.1 / 1 005 829 97939877.3 / 0 996 358

(71) Applicant: RESMED LIMITED
North Ryde, New South Wales 2113 (AU)

(72) Inventor: Berthon-Jones, Michael Leonay, New South Wales 2750 (AU)

(74) Representative: Asquith, Julian Peter
 Marks & Clerk,
 4220 Nash Court,
 Oxford Business Park South
 Oxford, Oxfordshire OX4 2RU (GB)

Remarks:

This application was filed on 25 - 10 - 2002 as a divisional application to the application mentioned under INID code 62.

(54) Apparatus for determining instantaneous elastic recoil pressure during ventilatory support

(57) An apparatus for determining an instantaneous elastic recoil pressure during the provision of respiratory assistance, comprises:

an air supply means controllable to supply breathable air to a subject's airway continually at a selectable pressure elevated above atmospheric pressure as a function of an instantaneous elastic pressure; a flow sensor means to generate a flow signal representative of respiratory airflow; and a processor means to process a flow signal from said flow sensor and to control said air supply means, wherein said processor is programmed to:

receive as input an elastance value for a subject; calculate an index value representing an extent to which any leak is suddenly changing using sampled flow values from said flow signal; calculating an inspired volume of airflow as a function of said measure of respiratory airflow and said index value: and

calculating said instantaneous elastic recoil pressure as a function of said inspired volume and said elastance value.
