(54) A pocket sack and an upper garment equipped with a pocket sack

(57) [Means]

A passage 3 that extends from the upper pocket 1 to the lower outlet 2 is formed. The lower end of the passage 3 is equipped with a receptacle 4, which is positioned immediately above the outlet 2. At a location upward of the receptacle 4, another outlet 5 that opens to one side of the passage 3 is formed. The outlet 5 and the lower outlet 2 are connected to each other via an outlet passage 6.

[Effects]

When a cell phone T is dropped in from the upper pocket 1, it glides down inside the passage 3 and is firmly received by the receptacle 4 established at the lower end. When the wearer of the jacket inserts their fingers through the lower outlet 2 and pushes up the receptacle 4, they can easily push out the cell phone T held inside through the outlet 5, which opens to one side of the passage 3. They can then take out the cell phone T from the lower outlet 2, which is connected to the outlet 5 via an outlet passage 6.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 03 00 6595

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
