(54) **Sicherungseinrichtung**

(57) Die Sicherungseinrichtung hat einen Sensor und einen Sender, der Signale zur Auslösung eines Alarms erzeugt. Damit die Signaleinrichtung bei konstruktiv einfacher Ausbildung und Herstellung eine einwandfreie Sicherung gegen Diebstahl gewährleistet, erfaßt der Sensor eine Lageveränderung und erzeugt ein entsprechendes Signal. Da der Sensor Bewegungen des zu schützenden Gegenstandes durch Messung ei-

ner spezifischen Größe erfaßt und aufgrund der Lageveränderung ein entsprechendes Signal erzeugt, muß die Sicherungseinrichtung nicht fest am zu sichernden Gegenstand installiert sein, sondern kann lösbar mit ihm verbunden werden. Die Sicherungseinrichtung kann wahlweise an unterschiedlichen Gegenständen, wie an Sportgeräten, Gepäckstücken, PC's, Fahrrädern und dergleichen oder auch als Überwachungseinrichtung beispielsweise für Kleinkinder verwendet werden.

European Patent
Office

Application Number

EP 03 00 8689

CLAIMS INCURRING FEES

The present European patent application comprised at the time of filing more than ten claims.

- ☐ Only part of the claims have been paid within the prescribed time limit. The present European search report has been drawn up for the first ten claims and for those claims for which claims fees have been paid, namely claim(s):
- ☐ No claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for the first ten claims.

LACK OF UNITY OF INVENTION

The Search Division considers that the present European patent application does not comply with the requirements of unity of invention and relates to several inventions or groups of inventions, namely:

see sheet B

- ☐ All further search fees have been paid within the fixed time limit. The present European search report has been drawn up for all claims.
- ☐ As all searchable claims could be searched without effort justifying an additional fee, the Search Division did not invite payment of any additional fee.
- ☐ Only part of the further search fees have been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the inventions in respect of which search fees have been paid, namely claims:
- ☒ None of the further search fees have been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the invention first mentioned in the claims, namely claims:

see annex

Office

LACK OF UNITY OF INVENTION
SHEET B

Application Number
EP 03 00 8689

The Search Division considers that the present European patent application does not comply with the requirements of unity of invention and relates to several inventions or groups of inventions, namely:

1. claims: 1-18,23

Sicherungseinrichtung mit einem Sensor zur Detektion einer
Lageveränderung

2. claims: 19-22

Sicherungseinrichtung mit Halterungsteil

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 03 00 8689

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
