(54) **Fabric finishing range and process for fabric finishing**

(57) The present invention refers to a textile finishing range that is at least composed of one moisturising unit, a compressive shrinking unit, a conveyor belt, and a compacting unit; the range is equipped with means

that allow the passage of the fabric either into the compressive unit or directly into the compacting unit, or, successively, into both compressive and compacting units.

This invention also refers to a process for fabric finishing.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 03 01 2418

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
