(54) **Activating device for a sliding electrical switch**

(57) The description relates to an activating device for a sliding electrical switch, comprising a control grip (4) and a containing body inside which some mobile contacts (10) move, made up of at least one lever (11) which is provided with a projection (14) presenting a wall

which is inclined at about 45 degrees and which is suitable for interacting with another similar wall which is obtained on the projection (17) of a sliding element (15), which is connected to the control grip (4), in order to push the said lever against a silicone bubble as a result of the translation of the sliding element (15).

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 03 00 8551

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
