(54) **Winding device, in particular for hoses and cables**

(57) A device is proposed to automatically wind hoses and cables by utilizing both an actuating motor unit and a particular guide unit so that the present device permits to wind hoses and cables by simply pushing a button while in the known solutions hoses and cables are usually wound manually.

Generally, the winding device according to the present invention is provided with a motor (4) to actuate both the rotation of a winding drum (2) and the angular displacement of a guide and distribution unit (6).

The distribution unit (6) is supported by a hanger (S). Two swinging arms (13) are hinged to the hanger (S) and are operated by an arm (12). A 360° articulated guide cone (14) is fixed to the ends of both swinging arms (13).
