(54) **Central support for shower latch**

(57) It is a support for shower latches comprising a body (11, 111) carrying the shower, sliding on a vertical guide rod (13) extending in a hole obtained in said body, a fork member (14, 114) carrying the shower turnably applied to the support body, and a device for locking the

support to the guide rod. The locking device is in the shape of a first class lever (15, 116) rotating around a fulcrum (15, 115) integral with the support body, engaging against the rod and manually actuable for allowing the sliding of the support along the rod.
