(54) **Tag-holder with flexible cord**

(57) The finding concerns a tag-holder with flexible cord, consisting of a bent flexible cord (2) equipped at the two ends with lobes (3, 4) which form the clip (5) for pressure closing on the tag (6). Such a tag-holder is characterised in that it is equipped with a cursor (7), consisting of a body equipped with two through-holes which engage on the two halves of the bent cord. It is also foreseen that said cursor, by sliding, adjusts the size of the slot (8), which is used to hang the tag-holder on the product (9) to be identified.
