(54) **Dart board for any type of darts**

(57) A dart board for safety darts and metal darts includes at least one flexible hole (311) in the target block (30) and at least one through hole (313) is defined in a periphery of the at least one flexible hole (311) so that the flexible hole (311) clamps dart tips of different sizes. A soft member is connected to an underside of the target block (30) so that the tip of the dart may be inserted in the soft member after passed through the flexible hole (311). By this way, the tip of the dart can be protected and the noise can be reduced.
