(54) **A sliding jogger**

(57) A sliding jogger comprises a fixed part 110 for securing to the frame of a blanking tool and a sliding part 112 slidable on the fixed part, the two parts being formed by stamping a respective blank from sheet metal and bending the blank. The fixed part comprises a substantially flat base portion 114 for securing to the frame of the blanking tool and a pair of opposite substantially parallel turned-in outer edges 116. The sliding part comprises a pair of opposite substantially parallel outer edges 120 which are slidably embraced by the outer edges 116 of the fixed part and a longitudinal central portion 118 which is substantially coplanar with the turned-in outer edges 116 of the fixed part.

FIG. 1
