(30) Priority: **02.09.2002 JP 2002256904**

(71) Applicant: **Calsonic Kansei Corporation**
Tokyo (JP)

(54) **Wireless communication system for vehicle**

(57) A wireless communication system for a vehicle, including: a portable transmitter-receiver adapted to communicate information wirelessly; a main controller mounted on the vehicle, the main controller adapted to communicate information wirelessly with the portable transmitter-receiver, to determine whether the portable transmitter-receiver is located within a communicatable

range, and to output an enable signal when the portable transmitter-receiver is located within the communicatable range; a sub-controller mounted on the vehicle and connected to the main controller, the sub-controller adapted to enable control of a vehicle mounted electronic device when the enable signal is input from the main controller.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 03 01 9929

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
