(54) Door with frame, made of plastic, for closing inspectable wall recesses

(57) The frame (T) and door (S) are made by plastic injection moulding. The door carries integrally on one side male projections (5) in the shape of a T and joined at right angles to the door by the central leg, said projections can be hinged quickly and removably to corresponding slots (2) provided in the sides of the frame. The slots (2) are in the shape of a T and they are located

transversely on the sides of the frame and are oriented so that the narrow part points away from the said frame. To hinge the door to the frame, all that is required is to insert the head of each hinge projection (5) of the door into the head of each slot (2) in the frame and then move the door translationally outwards so that the heads of the projections position themselves under the central legs of the slots.

CLAIMS INCURRING FEES

The present European patent application comprised at the time of filing claims for which payment was due.

Only part of the claims have been paid within the prescribed time limit. The present European search report has been drawn up for those claims for which no payment was due and for those claims for which claims fees have been paid, namely claim(s):

No claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for those claims for which no payment was due.

LACK OF UNITY OF INVENTION

The Search Division considers that the present European patent application does not comply with the requirements of unity of invention and relates to several inventions or groups of inventions, namely:

see sheet B

All further search fees have been paid within the fixed time limit. The present European search report has been drawn up for all claims.

As all searchable claims could be searched without effort justifying an additional fee, the Search Division did not invite payment of any additional fee.

Only part of the further search fees have been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the inventions in respect of which search fees have been paid, namely claims.

None of the further search fees have been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the invention first mentioned in the claims, namely claims:

1-8

The present supplementary European search report has been drawn up for those parts of the European patent application which relate to the invention first mentioned in the claims (Rule 164 (1) EPO).

**LACK OF UNITY OF INVENTION
SHEET B**

Application Number
EP 03 01 9888

The Search Division considers that the present European patent application does not comply with the requirements of unity of invention and relates to several inventions or groups of inventions, namely:

1. claims: 1-8

Door with frame with T-shaped hinge projections and slots positioned at a particular place of the frame surround

2. claims: 1, 9-13

Door with frame with T-shaped hinge projections, the door being made of plastic or comprising ventilation grilles

3. claims: 1, 14-15

Door with frame with T-shaped hinge projections and a lock

4. claims: 1, 4, 16-19

Door with frame with T-shaped hinge projections and means to attach the frame to a wall

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 03 01 9888

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
