(54) **Method and system for a notification system for use with vehicular transport**

(57) A method for and a notification system (10) are disclosed. The serves method for allowing a user to define a preset notification time period when a communication is to be initiated indicating that the vehicle (19) is near a vehicle stop. The notification system (10) comprises (a) a user telephone interface (29), (b) a computer system (14) for monitoring travel data associated with the vehicle (19), and (c) a system communications interface for establishing a communication between the computer system (14) and the user telephone interface (29)

when the vehicle (19) is at a location that corresponds with the preset notification time period from the vehicle stop. The method comprises the steps of: (a) permitting the user to define the preset notification time period by the following steps: (1) establishing a communication link (29') with the system communications interface; and (2) receiving the preset notification time period at the computer system (14) during the communication link (29').

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 03 02 3049

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
