(54) **Striker for electric or mechanical lock**

(57) A selvage for electric or mechanical lock with a pivot (7) for a pawl engagement system, comprising a rear fixing plate (2) in which two links (4) with through holes (5) are pivoted coaxially and independently. The holes (5) rotatably accommodate the ends of the pivot (7). The diameter of the ends (8) of the pivot (7) is smaller than the diameter of the holes (5), producing a mechanical play (9) that allows the pivot (7) to tilt its own axis with respect to the pivoting axis of the links (4).
