(54) Stove with built-in boiler for hot water production

(57) The present invention relates to a stove with built-in boiler for hot water production, which comprises a fire-box in which comburent air flows also when the mouth used to load wood is closed by the door, thanks to a series of intake openings that can be obstructed from the inside by means of a collapsible intercepting screen actuated by an electric engine controlled by a thermostat that closes the openings when hot water reaches the temperature set on the thermostat.
