(54) Improvements in or relating to a scaffolding post

(57) A scaffolding post is disclosed for use in supporting a safety barrier. The scaffolding post comprises a retaining member which is slidably movable along the post between a retaining position and a release position. The retaining member is configured so as to engage part of a safety barrier when located in its retaining position in order to prevent substantial movement of the safety barrier away from the post.

ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.

EP 03 02 2926

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
