(54) Return spring arrangement for handle

(57) A return spring arrangement for a handle in a door lock or a door latch comprises a body part (1) provided with restricting members (5, 6) for a spring (3), and a spring casing (2) to be rotatably connected to the body part, which spring casing, when installed, encloses both the restricting members (5,6) and the return spring (3) of the handle, the ends (3a, 3b) of which are arranged to cooperate with said restricting members (5, 6). The spring casing (2) is adapted, at least substantially, to be embedded in the body part (1) so that it forms a compact unit, which is arranged to be installed entirely into a countersink made in a door or the like, between the handle plate and the door lock or the door latch, and to be fastened by utilizing the fastening screws of the handle plate.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 04 25 2084

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
