(54) **Light switching system**

(57) The invention provides a switching system for a building with separated living rooms (1), wherein each living room has electrical appliances (6) which are connected to operating elements (5), wherein the switching system (4) is designed to switch the electrical appliances

(6) of two living rooms, and wherein the switching system is provided with an element (9), such as a switch of double switching type, with which the switching system at choice can be adapted as a first or a second, functionally different, type, the first type for a first and the second for a second lay-out type of the building.
