(54) **Method and apparatus for refilling liquid storage tanks**

(57) A method of refilling a liquid storage tank (2),
said method comprising providing:

a gaseous outlet (14) for removing gaseous content
from the tank during delivery of liquid to the tank;
a fluid flow restrictor (20) arranged to restrict flow
through said gaseous outlet in response to a filling

condition within the tank exceeding a threshold level;
and
pressure sensitive means (30) fluidly connected to
the interior of the tank for sensing a build up of pressure
within the tank in response to operation of said
fluid flow restrictor.

CLAIMS INCURRING FEES

The present European patent application comprised at the time of filing more than ten claims.

- ☐ Only part of the claims have been paid within the prescribed time limit. The present European search report has been drawn up for the first ten claims and for those claims for which claims fees have been paid, namely claim(s):
- ☐ No claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for the first ten claims.

LACK OF UNITY OF INVENTION

The Search Division considers that the present European patent application does not comply with the requirements of unity of invention and relates to several inventions or groups of inventions, namely:

see sheet 8

- ☒ All further search fees have been paid within the fixed time limit. The present European search report has been drawn up for all claims.
- ☐ As all searchable claims could be searched without effort justifying an additional fee, the Search Division did not invite payment of any additional fee.
- ☐ Only part of the further search fees have been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the inventions in respect of which search fees have been paid, namely claims:
- ☐ None of the further search fees have been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the invention first mentioned in the claims, namely claims:

European Patent
Office

LACK OF UNITY OF INVENTION
SHEET B

Application Number
EP 04 25 2574

The Search Division considers that the present European patent application does not comply with the requirements of unity of invention and relates to several inventions or groups of inventions, namely:

1. claims: 1-7,13-15

Liquid tank overfill prevention method whereby a sensor senses the activation of a vent flow restrictor; tank and apparatus therefor.

2. claims: 8-11,16,17

Liquid tank overfill method whereby a main vent is restricted and a secondary vent is activated; tank and apparatus therefor.

3. claim: 12

Liquid flow restrictor with float subjected to an attractive force.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 04 25 2574

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
