(54) **Method and device to air a building**

(57) The invention concerns a ventilation system for ventilating an accommodation in a building, with an air supply and an air exhaust and with resources for controlling the quantity allowed fresh air and/or the removed quantity used air and a control unit for controlling the

control appliances, where the system includes preferably one or more sensors that perform measurements to air in the building and provide an indication concerning the nature of the air supply and/or air exhaust and of which the measurement data are used by the control unit for controlling the control appliances.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 04 07 6476

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
