(71) Applicant: **Hispano Mecano Electrica S.A.**  
**08786 Capellades (Barcelona) (ES)**

(54) **Adjustable stop for setting the doors of metal cabinets and the like**

(57) The stop can be connected to the internal face of the cabinet door, determining a tangential edge with a structural element of the cabinet body to determine the closing position, bringing about setting of the door with respect to the cabinet body and characterised in that it is formed by two parts which are mutually connectable

in an adjustable manner such that one of them is capable of being fixed to a point of the internal structure of the cabinet door and the other, comprising an edge intended for setting the door in the frame of its opening, can be adjustably slid into the position necessary to absorb the play existing between the stop and the cabinet frame structure.

**ANNEX TO THE EUROPEAN SEARCH REPORT  
ON EUROPEAN PATENT APPLICATION NO.**

EP 04 38 0115

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.  
The members are as contained in the European Patent Office EDP file on  
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
