(54) **Spray booth**

(57) The spray booth (1) can be notionally divided into a set of adjacent regions ($Z_1, Z_2, \dots, Z_n$) which can be ventilated independently of each other. As a function of the shape of the article (101, 103) to be sprayed, only the regions occupied by said article are ventilated. In this way, it is possible to ventilate only the regions (Z_i) wherein harmful volatile substances are released instead of ventilating the whole room of the booth, thereby obtaining a considerable energetic saving. **ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 04 01 5576

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
