(54) **Container with double lids**

(57) The present invention provides a container with double lids, which has a container body (10) and a lid (20) unit to close an open top of the container body. The lid unit of the container includes a locking lid (25) which is made of a soft material and has a predetermined shape to correspond to an edge of the open top of the container body, with an opening provided at an inside part and a rim-shaped receiving part (26) provided on a lower end to receive therein the edge of the open top of the container body; and an observing lid (30). The observing lid includes a transparent cover plate (31) to be placed in the opening of the locking lid, and a coupling part (32) extending outward from an edge of the cover plate and to be inserted into the receiving part of the locking lid. The container allows a user to observe contents of the container through the observing lid.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 04 01 6009

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
