(54) **Device for fixing frames to pre-frames**

(57) A fixing device for fixing frames to pre-frames, comprising an angular profile (1) at a right angle, wherein one (2) of its walls has a series of openings (3) along the length thereof for the passage of screws which can be screwed to the frame, whereas the other wall (6), which supports the profile of the pre-frame, is provided with transverse notches (7) after its free edge for the passage of screws which can be screwed to the pre-

frame for the purpose of adjusting said fixing; the notches (7) having conical recesses on their external side for receiving the head of the screws, and supporting projections (8) on their internal side, the wall (6) being furthermore provided with a longitudinal step on its free edge defining a side area (9), whereas on its external surface, the wall (2) has, supporting ribs (4) for supporting it against the frame, and reinforcing ribs (5) on its internal surface.
