(54) **Shaped container carrier**

(57) The invention concerns a shaped container carrier, comprising one or more shaped housings (3, 3') for containers and a substantially plane support (5), characterised in that the support (5) and said one or more housings (3, 3') are capable to be coupled in an at least partially removable manner through mechanical means so that the container carrier is apt to assume at least one first loading configuration, wherein the inside of at least one housing of said one or more housings (3, 3') is accessible, and at least one second use configuration, wherein the inside of said one or more housings (3, 3') is closed and not accessible from the outside.
