(54) **Mechanical system for suspending, connecting and inclining loudspeaker enclosure line arrays**

(57) The invention regards a mechanical system for suspending, connecting and inclining loudspeaker enclosures in line, which includes a pair of link bars (16) for connecting the two sides of the enclosures, starting from a suspension or support frame, and a pair of adjustment

bars (17) for rear connection of the line of enclosures. The link bars of each pair of consecutive enclosures are joined together to form the enclosures' oscillation axis, whereas the adjustment bars set and fix the inclination of each enclosure by means of its oscillation on the aforementioned axis.

**ANNEX TO THE EUROPEAN SEARCH REPORT  
ON EUROPEAN PATENT APPLICATION NO.**

EP 04 42 5744

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on  
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
