(54) **An improved framework for supporting lighting strings for decorations of streets, columns, squares and shops**

(57) It is about an improved framework (1) used for suspension of decoration on streets, columns, squares and shops. This framework can have any geometrical

form and suspend with a wire (3) between two columns (5). Alternatively, this framework (1) can be fastened to the columns (5b) with flanges (6) or nailed on them.

Fig 1

## Description

**[0001]** This invention concerns an improvement of Patent No.1003632 and the new added element is the possibility for construction of a framework with the same aim with triangular or cyclical form or any geometrical form besides the original one, the rectangular. 5

Figure 1 presents two frameworks between two columns. 10

Figure 2 refers to a triangular framework fastened to a column in vertical position.

In figure 3 we see a cyclical framework fastened to a column in vertical position.

Figure 4 concerns a triangular framework fastened to a column. 15

In figure 5 a trapezoid framework fastened to the column is noticed.

Figure 6 a polygonal framework is presented fastened to the column. 20

**[0002]** Concerning the figures the framework - equilateral triangle, rectangular triangle, cyclical, trapezoid or polygonal- is comprised from main body -1-, 1b-, -1d-, 1a-, 1c-, 1e-, 1f, which is an aluminum framework or any other available metal. There the lights of decoration -2-, -2b-, -2c- are installed. 25

**[0003]** This framework is also available with cover of color or transparent plastic -10- according to its desirable use. 30

**[0004]** The framework is fastened by latches or lugs -4- on a wire -3- which is tightened between two columns -5-5a-5b-5c-5d-5e- and with holders -7- or nails -7a-7b-7c- or flanges -6-. 35

## Claims

1. An improved framework used for decorations on streets, columns, squares and shops and is characterized that is comprised from: 40

The framework -equilateral triangle, rectangular triangle, cyclical, trapezoid or polygonal- is comprised from main body -1-, 1b-, -1d-, 1a-, 1c-, 1 e-, 1f, which is an aluminum framework or any other available metal. There the lights of decoration -2-, -2b-, -2c- are installed. 45

This framework is also available with cover of color or transparent plastic -10- according to its desirable use. 50

The framework is fastened by latches or lugs -4- on a wire -3- which is tightened between two columns -5-5a-5b-5c-5d-5e- and with holders -7- or nails -7a-7b-7c- or flanges -6-. 55
