(54) **Antivibration assembly for electric lock**

(57) An antivibration assembly for electric lock, comprising a casing (2) provided with guiding means for a translational motion of a ferromagnetic core (4) that is controlled by an electromagnet (3) and is associated with mechanical closure and opening elements (7); indirect

contact means being interposed between the core (4) and the casing (2) and being adapted to dampen impulsive translational motions of the core (4) within the casing (2) generated by break-in percussive actions against the casing (2).
