(54) **Folding cylindrical section tent with hidden illumination**

(57) The tent with internal hidden illumination which consists of:

- Construction's external surface.
- The tent's framework part.
- The electrical installation of illumination and the electrically or manually driven system for unfolding and elevating the tent.

It has the characteristic to defer from common tents in that it internally has hidden illumination with lamps

which lean on the folding rings and that the lamps do not hinder the tent's unfolding - elevation but, to the contrary, they follow a parallel course.

It is easy and safe and promotes the space on which it is placed.

It is constructed in desirable sizes of unlimited combinations and in accordance with the customer's desires. As well as in two models, either with electrical or manual traction and repulsion of the tent's unfolding and elevation strings.

**ANNEX TO THE EUROPEAN SEARCH REPORT  
ON EUROPEAN PATENT APPLICATION NO.**

EP 04 38 6030

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.  
The members are as contained in the European Patent Office EDP file on  
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
