(54) **Device for fixing flowerpot holders to window sills**

(57) The device (1) for fixing flowerpot holders to a window sill (3) provided with drip (8) is formed of a plate (2) having quadrangular shape, bent at a right angle with respect to its longer side, having at least one plane resting on said window sill (3) and provided with two vertical slits, wherein two clamps (6) integral with at least one second plate (7) are inserted, said second plate (7) also having

quadrangular shape and being bent at a right angle, one end of which is bent backwards, in a manner so as to allow fixing to said drip (8), said first plate (2) and said second plate (7) forming a "C" turned upside down, which like a bracket embraces the external part of the window sill (3). The fixing of the device according to the present invention to the window sill is carried out without invasive works on the wall structure and without the use of tools.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 04 42 5952

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
