(54) **Forming device for concrete casts**

(57) Forming device (10) for concrete casts for making a building artifact (11), comprising a plurality of lateral elements (12, 13, 15, 16), associated with each other so as to define the outer profile of the building artifact (11), and clamping members (17) to selectively clamp together the lateral elements (12, 13, 15, 16) so as to form a com-

pact and substantially rigid structure. The clamping members (17) comprise a flexible element (19) of the non-extendable type, arranged externally around the lateral elements (12, 13, 15, 16) and a plurality of tensioning members (20, 21) associated with the lateral elements (12, 13, 15, 16) in order to act against the flexible element (19) and determine the tensioning thereof.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 04 03 0935

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
