(54) **Gaming machine**

(57) It is disclosed a gaming machine comprising: a display device with a first display area and a second display area; a first game controller for executing a first game in which symbols are scrolled in each of plural rows on the first display area and a game result is determined corresponding to the symbol or a symbol combination stopped and displayed on the first display area; a first determination device for determining whether or not a predetermined symbol is included in the symbols stopped and displayed in the first game; a second game controller for executing a second game in which the symbols are scrolled in each of plural rows on the first display area when the first determination device determines that the predetermined symbol is included in the symbols stopped and displayed in the first game; and a payout device for paying out a game medium corresponding to a game result in the first game or the second game; wherein the second game controller controls the display device so that a specific symbol characterizing the second game is displayed on the second display area and controls the payout device to pay out the game medium when any one of the symbols stopped and displayed on the first display area in the second game coincides with the specific symbol.
