London EC2M 7LH (GB)

(54) **Automatic beverage vending machine.**

(57) The invention is to provide an automatic beverage vending machine capable of automatically opening the gate of its article outlet with a simple structure. Thus, when a carrying mechanism (100) carries a cup (A) ahead from behind the article outlet (11), an extruding plate (123) fitted to a first carrying mechanism body (102a) opens the gate (110). Therefore, the gate (110) can be automatically opened without having to use expensive equipment, such as a dedicated motor, with a corresponding saving in manufacturing cost, and enables the buyers to pick up delivered cups (A) more easily.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 05 25 0816

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
