(54) **Fence**

(57) A fencing system consists of anchoring elements 21 for securing the fence in the ground, as well as posts 22, which are attached to the anchoring elements 21 and fencing and/or wire meshing, which are fastened to the posts.

The anchoring element 21 has a baseplate 23 and a projection 24, which is attached to the underside of the baseplate. When installing the fence the projection 24 is

pushed or driven into the ground and consists of four upright plates 27 perpendicular to each other, which taper to a point 28.

The post 22 extends through a hole in the baseplate 23 to under the baseplate and is attached to the plates 27. There are tent pegs 29 in a number of the openings 26 situated in the baseplate with which the anchoring element 21 is secured even more firmly in the ground.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 05 07 5650

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
