(54) Power transmission device, method for assembling the same, and vehicle

(57) The aim is to provide an improved power transmission device being more easy to assembly.

A power transmission device, in particular for a vehicle, preferably a motorcycle, including a drive shaft (31) journaled by a drive side transmission case (22) with one end of the drive shaft (31) extending beyond the drive side transmission case (22), a drive wheel (35) mounted onto the one end of the drive shaft (31), a driven side

transmission case mounted (23) onto the drive side transmission case (22), wherein a regulating member (54) is positioned to approach an outside surface of the drive wheel (35) from a location outward of the one end (34) in an axial direction of the drive shaft (31) to be mounted onto the driven side transmission case (23), wherein the regulating member (54) regulates an axial movement of the drive wheel (35) relative to the driven side transmission case (23).

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 05 00 5754

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
