(54) **Method and telecommunications network for carrying a digital broadcast signal**

(57) The object of the invention is a method and a telecommunications network (1) for carrying a digital broadcast signal to a wireless terminal device (5). In the method, at least one transmitter (4) transmits a digital broadcast signal and at least one wireless terminal device (5) receives said digital broadcast signal. Further, in

the method at least one receiver (7) receives the digital broadcast signal transmitted by the transmitter (4) and carries the received digital broadcast signal to at least one master antenna network (3). An antenna means (6) forwards the digital broadcast signal received from the master antenna network (3) to the wireless terminal device (5) over the air.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 05 00 7141

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
