### (54) A multi-purpose handle for window or door units

(57) A handle for window or door units comprises, on at least one of its surfaces, a through hole for handle (1) movement means (2); at said hole there being control means for opening and closing the window or door unit. The handle (1) further comprises: a core-body (3) which can be connected, using retaining means (4), to the surface of the window or door unit; the core-body (3) having, on one side, a first part (5) of the movement means (2) which can be connected to the control means and, on the opposite side of the core-body (3), there being a pro-

jecting second part (6) of the movement means (2) consisting of a shaft (7) with a square cross-section; a covering element (8) for the core-body (3) which can be positioned on the core-body (3), with a through hole (9) for the shaft (7) with the square cross-section; a grip (10) which can be connected to the shaft (7) with the square cross-section; means (11) for joining the grip (10) and the shaft (7) with the square cross-section to one another, acting from the outside of the grip (10), allowing a co-ordinated opening and closing movement of the window or door unit using the grip (10).

ANNEX TO THE EUROPEAN SEARCH REPORT  
ON EUROPEAN PATENT APPLICATION NO.

EP 05 42 5276

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on. The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
