(54) Control device for textile weaving looms

(57) A control device for textile weaving looms (23), which enables the simple and efficient connection of the axle (18) of the driving motor (1) with the main axle (3) and various secondary axes (6,26) to carry out all the typical operations of a loom; the loom control device (23) provides at least one gear (2) rigidly connected to the driving axle (18) of the control motor (1), which controls the main axle (3) and the secondary axes (6,26) through further gears (4,5). The main axle (3) supplies movement to the comb or sley (23A) of the loom (23) and to all the auxiliary groups connected to it while a second secondary axle (6) supplies movement to the accessory and shed formation devices (22).
