(54) **Tub construction for dishwasher**

(57) A tub construction for a dishwasher is provided. The tub (200) construction includes an upper panel (210), a lower panel (230) disposed below the upper panel, and an intermediate panel perpendicularly connecting the upper and lower panels. The tub construction of the present

invention not only allows for a quicker assembly of the tub (200), but also an easier changing of the tub's outer dimensions. Furthermore, when seam welding, by changing the dimensions of the flanges at the corners, wrinkles at the corners are prevented, creating an even, leakproof welding line.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 05 29 1317

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
