(54) A liner assembly for a transport container

(57) A liner assembly (2) for use with a transport container. The liner assembly comprises a liner (2b) having an outlet gland (4) for co-operation with an outlet aperture (6) of a container (5) and a fill gland (3) through which contents of a product to be transported can be introduced into the liner (2b). The liner is mounted on a support sheet (1) of semi-flexible material. The sheet (1) is adapted to

engage the outlet gland (4) of the liner assembly (2) in a fixed position relative to the sheet (1). The sheet (1) is substantially the same shape and dimensions of a bottom surface of the container (5), so that when said liner assembly is introduced into a container, correct engagement of the outlet gland (4) with the discharge outlet aperture (6) can be assured.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 05 25 3886

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
