(54) **Modular gripper**

(57) A structurally modifiable gripper for handling circuit boards or similar boards, which gripper comprises a connecting adapter (2) for fixing the gripper to an actuator, such as a robot, a frame part (1), at least one connecting part (3) and at least one gripping element (6). To a first groove (4) located in the frame part of the gripper

has been movably arranged a connecting adapter for connecting the gripper to an actuator and to a second groove (5) located in the frame part has been further arranged at least one connecting part for fixing at least one gripping element. The invention also relates to a method for fixing the gripper to the frame part of the gripper.

ANNEX TO THE EUROPEAN SEARCH REPORT  
ON EUROPEAN PATENT APPLICATION NO.

EP 05 10 6237

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on  
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
