(54) **Windscreen apparatus**

(57) To provide a windscreen apparatus which can provide a good screening effect also for traveling wind from the front of a driver while suppressing the height of a screen.

In the windscreen apparatus including a front cowl 16 having a screen 25 mounted to a vehicle body, an air outlet port 36 opening upward is provided at the center portion of the upper portion of the screen 25, and an air duct 27 for communicating the air outlet port 36 and an air introduction port 37 provided in the front cowl 16 is formed in the screen 25.
