(54) **Wheeled jack with handle for running and lifting**

(57) The invention concerns a jack (1) with a handle (2) for drawing the jack (1), where the handle (2) has at least two positions, a first position in continuation of the jack (1) for drawing it and a second, locked position substantially above the jack (1) in order to act as carrying

handle for the jack (1). Hereby is achieved that by means of the handle (2) one may place the jack (1) at the right position under e.g. a vehicle to be lifted. As one may also lock the handle (2) at a position above the jack (1) itself, one may carry it just by lifting the handle (2), without using a separate handle.

**CLAIMS INCURRING FEES**

The present European patent application comprised at the time of filing more than ten claims.

- Only part of the claims have been paid within the prescribed time limit. The present European search report has been drawn up for the first ten claims and for those claims for which claims fees have been paid, namely claim(s):
- No claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for the first ten claims.

LACK OF UNITY OF INVENTION

The Search Division considers that the present European patent application does not comply with the requirements of unity of invention and relates to several inventions or groups of inventions, namely:

see sheet B

- All further search fees have been paid within the fixed time limit. The present European search report has been drawn up for all claims.
- As all searchable claims could be searched without effort justifying an additional fee, the Search Division did not invite payment of any additional fee.
- Only part of the further search fees have been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the inventions in respect of which search fees have been paid, namely claims:
- None of the further search fees have been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the invention first mentioned in the claims, namely claims:

The Search Division considers that the present European patent application does not comply with the requirements of unity of invention and relates to several inventions or groups of inventions, namely:

1. claims: 1-9

Jack with a handle characterized by the handle having a locked position in which the handle extends along with the underside of the jack, thereby acting as a carrying handle

2. claim: 10

Securing fitting characterized by its shape enabling supporting interaction with the wheel axles of a pair of wheels of a jack

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 05 01 9411

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
