(54) Washing/drying machine

(57) A washing machine includes a drum and a condensing duct that communicates with the drum. The condensing duct includes an air inlet unit, a condensing unit and an air outlet unit which are connected sequentially. A condensed water jetting member is provided inside the

condensing unit and a flow blocking guide is provided inside the condensing unit. The condensing unit has a flow width larger than the air inlet unit and the air outlet unit.

LACK OF UNITY OF INVENTION SHEET B

Application Number

EP 05 11 0672

The Search Division considers that the present European patent application does not comply with the requirements of unity of invention and relates to several inventions or groups of inventions, namely:

1. claims: 1-8

A washing machine comprising a condensing duct, the latter including a bent outlet.

2. claims: 9-20

A washing machine comprising a backward flow blocking guide and a backward flow blocking projection.

3. claims: 21-23

A washing machine comprising a condensing duct and a drum.

4. claims: 24-25

A dryer.

ANNEX TO THE EUROPEAN SEARCH REPORT ON EUROPEAN PATENT APPLICATION NO.

EP 05 11 0672

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
