(54) **Method for building a reservoir, and a reservoir, a bag, an assembly and a method for manufacturing a lining**

(57) A method for building a reservoir for one or more solids and/or liquids, for instance a silo or basin for storage of water, comprising:

- determining a reservoir ground surface;
- placing on said ground surface a substantially closed bag of flexible material, while, during use, a space surrounded by the bag forms a storage volume which can be filled with said solids and/or liquids; and

- providing at least one supporting side wall extending upwards from an edge of the ground surface (B), for supporting, during use, an adjoining side of said bag.

The invention further provides a reservoir, a bag, an assembly and a method for manufacturing an inside liner or lining.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 06 07 5348

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
