(54) A gripper

(57) A gripper (10) for an Axminster gripper loom comprises a gripper body (12) and a gripper jaw (14). The gripper body (12) and the gripper jaw (14) are formed

to define mutually engageable connectors (24,40) to pivotally connect the gripper jaw (14) to the gripper body (12).

CLAIMS INCURRING FEES

The present European patent application comprised at the time of filing claims for which payment was due.

Only part of the claims have been paid within the prescribed time limit. The present European search report has been drawn up for those claims for which no payment was due and for those claims for which claims fees have been paid, namely claim(s):

No claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for those claims for which no payment was due.

LACK OF UNITY OF INVENTION

The Search Division considers that the present European patent application does not comply with the requirements of unity of invention and relates to several inventions or groups of inventions, namely:

see sheet B

All further search fees have been paid within the fixed time limit. The present European search report has been drawn up for all claims.

As all searchable claims could be searched without effort justifying an additional fee, the Search Division did not invite payment of any additional fee.

Only part of the further search fees have been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the inventions in respect of which search fees have been paid, namely claims:

None of the further search fees have been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the invention first mentioned in the claims, namely claims:

The present supplementary European search report has been drawn up for those parts of the European patent application which relate to the invention first mentioned in the claims (Rule 164 (1) EPC).

LACK OF UNITY OF INVENTION
SHEET B

Application Number

EP 06 25 0982

The Search Division considers that the present European patent application does not comply with the requirements of unity of invention and relates to several inventions or groups of inventions, namely:

1. claims: 1-5,7,8,10

A gripper for an Axminster gripper loom comprising a gripper body and a gripper jaw, the gripper body and the gripper jaw being formed to define mutually engageable connectors to pivotally connect the gripper jaw to the gripper body. Loom and methods using the gripper.

2. claims: 6,7,9,10

A gripper for an Axminster gripper loom comprising a gripper body and a gripper jaw, the gripper jaw being pivotally connected to the gripper body and being formed to define a resilient lever to increase the gripping force of the gripper when actuated. Loom and methods using the gripper.

ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.

EP 06 25 0982

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on. The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
